

Section 1: Overview of Energy Consumption

1. Which sector in Pakistan historically consumes the largest share of electricity?
 - A) Industrial
 - **B) Domestic (Residential)**
 - C) Agricultural
 - D) Transport
2. The total energy consumed by a country is a measure of its:
 - A) Population size only
 - **B) Industrial development and standard of living**
 - C) Geographic area
 - D) Number of rivers
3. In Pakistan, most of the energy for the transport sector comes from:
 - A) Electricity
 - B) Coal
 - **C) Petroleum products (Petrol/Diesel/CNG)**
 - D) Solar power
4. Which sector uses the most Natural Gas for the production of fertilizers?
 - A) Domestic
 - **B) Industrial (Fertilizer plants)**
 - C) Transport
 - D) Commercial
5. "Load Shedding" in the energy sector is caused by:
 - A) Excess energy production
 - **B) Gap between energy supply and high demand**
 - C) Use of solar panels
 - D) Exporting electricity to other countries

Section 2: The Industrial and Agricultural Sectors

6. The industrial sector mainly uses energy for:
 - A) Lighting and fans only
 - **B) Running heavy machinery and boilers**
 - C) Cooking food
 - D) Irrigation

7. Which industry in Pakistan is a major consumer of both gas and electricity?
- A) Textile Industry
 - B) IT Industry
 - C) Tourism Industry
 - D) Cottage Industry
8. In the agricultural sector, energy is primarily used for:
- A) Harvesting by hand
 - B) Running tube wells for irrigation
 - C) Lighting the fields at night
 - D) Manual ploughing
9. The transition from animal power to tractors and harvesters is called:
- A) Industrialization
 - B) Mechanization of Agriculture
 - C) Urbanization
 - D) Electrification
10. Which fuel is most commonly used for agricultural machinery in Pakistan?
- A) Petrol
 - B) Diesel
 - C) Kerosene
 - D) Natural Gas

Section 3: Domestic and Transport Sectors

11. In Pakistani households, the highest energy consumption during winter is for:
- A) Air conditioning
 - B) Water heating and space heating
 - C) Lighting
 - D) Refrigeration
12. Which appliance in a typical home usually consumes the most electricity in summer?
- A) LED bulb
 - B) Air Conditioner
 - C) Television
 - D) Computer

13. **The transport sector in Pakistan is heavily dependent on:**
 - A) Imported Coal
 - **B) Imported Petroleum**
 - C) Domestic Wood
 - D) Wind energy
14. **Using public transport instead of private cars helps in:**
 - A) Increasing pollution
 - **B) Energy conservation**
 - C) Increasing traffic jams
 - D) Increasing fuel imports
15. **Railways are considered more energy-efficient than road transport because:**
 - **A) They can carry more load with less fuel per ton**
 - B) They move faster than planes
 - C) They run on wood
 - D) They do not use engines

Section 4: Rapid Fire Review (16-100)

16. **Energy used by shops and offices is called? (Ans: Commercial Sector)**
17. **What is 'Energy Audit'? (Ans: Measuring and analyzing energy use to reduce waste)**
18. **Main source of energy for the Cement industry? (Ans: Coal/Gas)**
19. **Does the Brick Kiln industry use renewable energy? (Ans: No, mostly coal/rubber/wood)**
20. **Is electricity a 'primary' or 'secondary' energy source? (Ans: Secondary)**
21. **Device that saves energy in lighting? (Ans: LED Bulbs)**
22. **Sector that uses 'Captive Power Plants'? (Ans: Industrial)**
23. **What is 'Peak Demand'? (Ans: Times when electricity usage is highest)**
24. **Does the Iron and Steel industry require high energy? (Ans: Yes, for melting metal)**
25. **Main fuel for Rickshaws and small cars in the 2010s? (Ans: CNG)**
26. **Which sector is affected most by 'Gas Load Shedding' in winter? (Ans: Industry and Domestic)**
27. **Unit of gas consumption on bills? (Ans: MMBtu/HM3)**

28. Does waste of water lead to waste of energy? (Ans: Yes, energy is used to pump water)
29. What is 'Energy Conservation'? (Ans: Reducing energy consumption through efficiency)
30. Primary fuel for heavy trucks? (Ans: Diesel)
31. Is solar energy increasing in the domestic sector? (Ans: Yes)
32. What are 'Energy Efficient' appliances? (Ans: Appliances that do the same work using less power)
33. Does the Government subsidize energy for which sector? (Ans: Usually Agriculture/Life-line domestic users)
34. Main energy source for the Aviation (Airplane) sector? (Ans: Jet Fuel/Kerosene based)
35. Sector using 'Tube-wells'? (Ans: Agricultural)
36. Does urbanization increase energy demand? (Ans: Yes)
37. What is 'Power Theft'? (Ans: Illegal use of electricity (Kunda system))
38. Impact of power theft on the economy? (Ans: Circular Debt/Financial loss)
39. Is wood still a major domestic energy source in rural Pakistan? (Ans: Yes)
40. Percentage of population with access to electricity? (Ans: Approx. 70-80% - varies by year)
41. What is 'Hydel' energy? (Ans: Electricity from water)
42. Does the Tobacco industry use energy for 'Curing'? (Ans: Yes, usually wood or gas)
43. Is the Sugar industry energy self-sufficient? (Ans: Often yes, using Bagasse)
44. What is 'Bagasse'? (Ans: Sugarcane residue used as fuel)
45. Major energy consumer in the Telecommunication sector? (Ans: Mobile Towers/Data Centers)
46. How can a farmer save energy? (Ans: Using Solar tube-wells/Drip irrigation)
47. Does over-cooking waste energy? (Ans: Yes)
48. Best time to use heavy appliances to help the grid? (Ans: Off-peak hours)
49. Sector using most of the Coal in Pakistan? (Ans: Power Generation and Cement)
50. Is natural gas used for making Plastic? (Ans: Yes, as a raw material/energy)

51. Main cause of energy crisis? (Ans: Reliance on expensive imports and transmission losses)
52. What is 'Transmission Loss'? (Ans: Energy lost while traveling through wires)
53. Does a 'Geyser' use more gas if not insulated? (Ans: Yes)
54. What is 'Thermal Power'? (Ans: Electricity from burning fuel)
55. Is 'Nuclear' a significant part of Pakistan's energy mix? (Ans: Yes, around 8-10%)
56. Does the transport sector contribute to Smog? (Ans: Yes, via emissions)
57. Can Electric Vehicles (EVs) reduce petroleum demand? (Ans: Yes)
58. Is energy needed for water purification? (Ans: Yes, for RO plants/boiling)
59. Main domestic energy use in cities? (Ans: Natural Gas)
60. Main domestic energy use in remote villages? (Ans: Biomass/Wood)
61. What is 'Smart Grid'? (Ans: Digital technology to manage electricity efficiently)
62. Does industrial growth lead to higher GDP? (Ans: Yes)
63. Are fans in Pakistan energy-rated? (Ans: Yes, Star rating by NEECA)
64. What is NEECA? (Ans: National Energy Efficiency and Conservation Authority)
65. Benefit of insulation in buildings? (Ans: Reduces need for heating/cooling)
66. Does the Sports industry (Sialkot) use energy? (Ans: Yes, for manufacturing)
67. Energy source for Steam Engines (Historical)? (Ans: Coal)
68. Is Tidal energy used in Pakistan? (Ans: Not yet on a large scale)
69. Does the Mining sector consume energy? (Ans: Yes, for drilling and transport)
70. What is 'Co-generation'? (Ans: Producing heat and electricity simultaneously)
71. Which sector is most sensitive to fuel price hikes? (Ans: Transport)
72. Can biogas be used in the domestic sector? (Ans: Yes, for cooking)
73. Energy used by Street Lights belongs to? (Ans: Public/Commercial Sector)

74. Do Hospitals require 24/7 uninterrupted energy? (Ans: Yes)
75. What is 'Circular Debt'? (Ans: Payment deficit in the energy supply chain)
76. Main fuel for 'Chulas' in rural areas? (Ans: Dung cakes/Wood)
77. Which province produces the most Gas? (Ans: Sindh)
78. Which province produces the most Hydel power? (Ans: KPK)
79. Is 'Thar Coal' used for energy? (Ans: Yes, for power plants)
80. Does energy cost affect the price of food? (Ans: Yes, due to transport/irrigation costs)
81. What is a 'Unit' of electricity? (Ans: 1 Kilowatt-hour)
82. Does iron pressing use high wattage? (Ans: Yes)
83. Benefit of carpooling? (Ans: Saves fuel/energy)
84. Can wind energy support the Industrial sector? (Ans: Yes, via the national grid)
85. Is the 'Karakoram Highway' important for energy transport? (Ans: Yes, for oil tankers)
86. Do dams serve purposes other than energy? (Ans: Yes, Irrigation/Flood control)
87. Main energy challenge for Pakistan? (Ans: Circular debt and Line losses)
88. What is 'Line Loss'? (Ans: Technical and non-technical loss of power in lines)
89. Is LPG used where Natural Gas pipelines don't reach? (Ans: Yes)
90. Is 'Kerosene' still used for lighting? (Ans: Very rarely, replaced by LEDs/Solar)
91. Does the Pharmaceutical industry need energy? (Ans: Yes, for temperature control/labs)
92. Can 'Solar Geysers' save gas? (Ans: Yes)
93. Is 'Uranium' used in Pakistan's energy sector? (Ans: Yes, for Nuclear power)
94. Which sector uses energy for 'Cold Storage'? (Ans: Agriculture/Food Industry)
95. Does planting trees help in energy conservation? (Ans: Yes, provides shade/cool environment)
96. What is 'Green Building'? (Ans: Building designed to be energy efficient)
97. Is 'Waste-to-Energy' a solution for cities? (Ans: Yes)
98. Main goal of 'Integrated Energy Plan'? (Ans: To balance supply and demand)

- 99. Is energy essential for modern communication? (Ans: Yes)**
- 100. The most important factor in saving energy is? (Ans: Individual Awareness/Behavioral change)**
